## **Important Facts About Your Invisalign Aligners**

### **Wear**

- Aligners must be worn a minimum of 22-24 hours per day.

### **Care**

- Aligners should be brushed with a denture brush and soap and water every time you brush your teeth. Please do not use toothpaste on them, it is too abrasive. In addition to brushing you may clean them three to four times a week with *Retainer Brite*. Additional supplies of *Retainer Brite* may be ordered at [www.retainerbrite.com](http://www.retainerbrite.com) or at 1-800-866-6884.
- When aligner is not being worn, it should remain in the case.

### **Compliance**

- Lack of compliance with prescribed wear schedule may result in the need for mid-course correction.
- You will be responsible for the additional fees incurred for the necessary new records and aligner fabrication.

### **Lost Aligners**

- If you lose your aligners, you should wear your last previously worn aligners.
- Replacement aligners cost \$100 each (\$200 for both upper and lower.)

### **Case Refinement**

- At the completion of the prescribed set of aligners, case refinement is often needed to properly finish treatment.
- If refinement is necessary, the additional records and aligners would be included in your original Invisalign fee.
